

TITLE PAGE

- **Problem Statement ID – 1555**
- **Problem Statement Title – Create a Virtual Herbal Garden that provides an interactive, educational, and immersive experience to users, showcasing the diverse range of medicinal plants used in AYUSH (Ayurveda, Yoga & Naturopathy, Unani, Siddha, and Homeopathy).**
- **Theme – BioTech/HealthTech**
- **PS Category – Software**
- **Team Name – Code Hackerz**

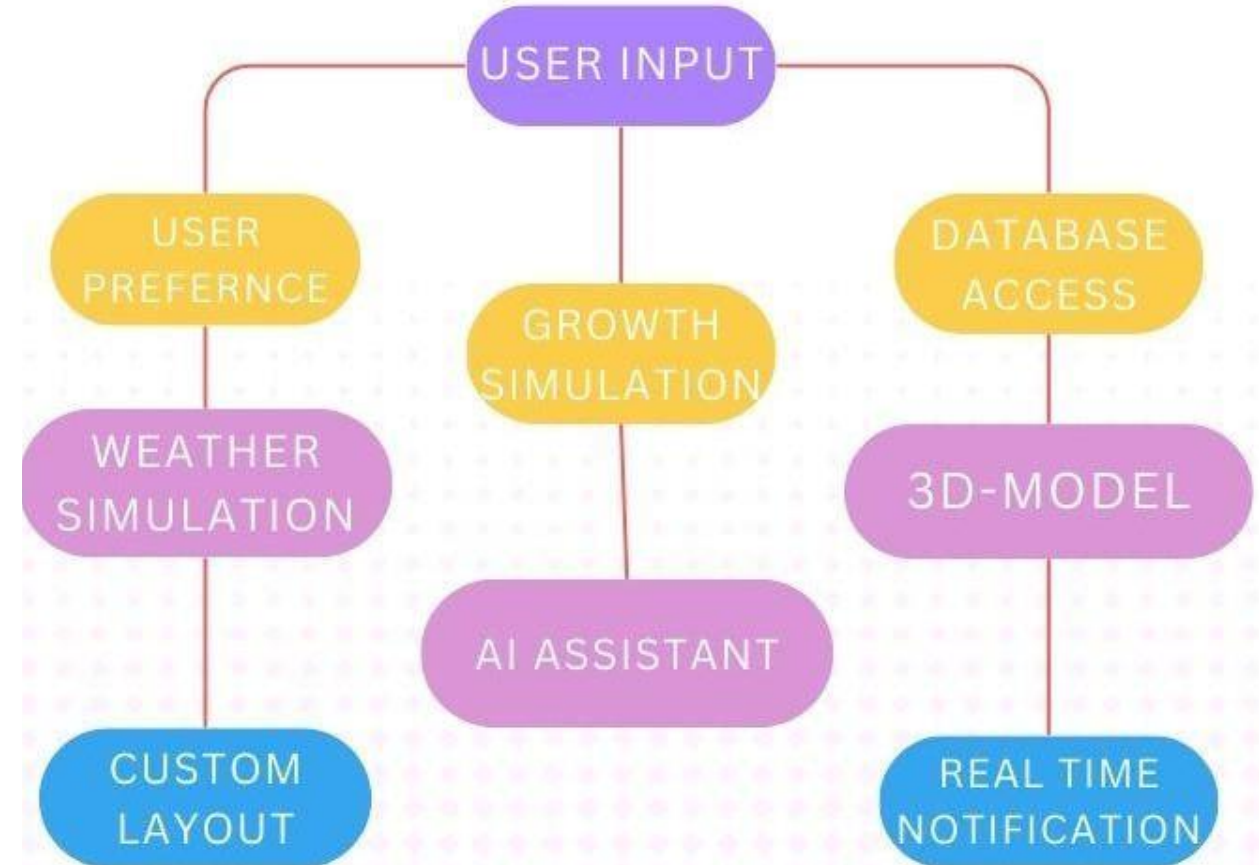

IDEA / APPROACH DETAILS

SOLUTION – Providing access to medicinal plant knowledge from anywhere, overcoming limitations of physical garden through our website, **DigiHerb**

- **Interactive Learning:** Offers 3D models of plants for detailed exploration, including rotation and zoom features, enhancing user engagement and understanding.
- **Multimedia Integration:** Use of high quality images and **3D- models** with help of tools like blender.
- **User Engagement:** Enables users to bookmark favorites, take notes, and share content on social media, fostering community interaction and personalized learning
- **Artificial Intelligence:** Using machine learning to develop image recognition and personalized plant recommendations to the user.

Tech Stack

Our website **DigiHerb** is viable due to the growing interest in AYUSH digital education, accessible advanced technologies for 3D modeling and web development and user acceptance

- **Log in Sign up Page:** Provides users to create their profile and bookmark plants, add favorites, and create their own personalized virtual garden.
- **Interactive UI/UX** for easy accessibility
- **Search feature:** Enables quick access to specific plants and their detailed information
- **Educational Content:** Different quizzes related to medicinal plants to enhance knowledge and learn interesting plant facts.
- **Explore Plants:** Provides brief information of more than 200 different plants with their medicinal value and properties, in an ordered fashion.

Use Cases:

- **University Courses:** Enhance courses on botany, herbal medicine, or environmental science
- **Urban Planning:** Promote integration of herbal gardens in community green spaces.
- **Industrial Innovation:** Explore properties of herbs that can be used in cosmetic and medicinal industries.
- **Skill Sharing:** Offers a platform to users to share their experience and problems related to uses of herbs.

Benefits:

- **Enhanced Education:** Provides students, practitioners, and enthusiasts with a comprehensive and interactive tool for learning about medicinal plants in AYUSH.
- **Increased Accessibility:** Makes knowledge about medicinal plants accessible to a global audience, regardless of physical location.
